

Secure Healthcare Billing Solutions

End-to-End Solutions for Simple Office Workflow

As a healthcare provider, it is essential to follow guidelines in accordance with HIPAA regulations.

Privacy & Security Regulations

Health Insurance Portability and Accountability Act of 1996 (HIPAA)

"A major goal of the Privacy Rule is to ensure that individuals' health information is properly protected while allowing the flow of health information needed to provide and promote high quality health care and to protect the public's health and well-being."

"A major goal of the Security Rule is to protect the privacy of individuals' health information while allowing covered entities to adopt new technologies to improve the quality and efficiency of patient care."

Digital Solutions FlexStream Software

- Organize, sort, group and enhance documents for printing
- Add Scancodes for variable page processing, document integrity, and verification
- Correct addresses (reduce returned mail)
- Add variable and static marketing text, graphics, logos, QR codes or barcodes

FlexStream Software is a document automation solution that gives organizations control over their mailing process. With its unmatched versatility, FlexStream automates and simplifies business workflow. It ensures security and document integrity by adding scancodes that are read by the folder inserter. FlexStream allows the user to choose which documents to print and mail, and which to send electronically.

Document Solutions FPi Folder Inserter

- Automatic job setup allows you to program a job in 30 seconds, without the need for trial pieces.
- Double Document Detection ensures only correct documents are folded and inserted.
- Process HICFA forms along with vendor and payroll checks. Easily process marketing mail such as: glossy, pre-folded and perforated media.

An FPi Folder Inserter offers enhanced efficiency and robust security that stretches the value of your mailroom's folding and inserting processes. Our

folder inserters process your mail up to 70 times faster than by hand. These systems reduce risk and allow you to comply with local and federal regulations.

Further automate your mailing process by interfacing an FPi folder inserter to the PostBase[®] pro or PostBase[®] pro DS, you can transform printed paper into folded, stuffed, sealed, weighed, metered, and stacked mail with little user intervention.

Mailroom Solutions PostBase[®] Machine

- Exclusive to FP's PostBase[®] line, SealCheck envelope sealers ensure security by validating that each envelope flap passes through the sealer.
- The intuitive icon driven menu makes operation simple and easy, like operating a cell phone.
- Dynamic Scale option offers high-speed processing of mixed mail up to 90 letters per minute, while accurately measuring the size and weight of each envelope.

The PostBase[®] Postage Meter is a robust and intuitive mailing system that offers uncompromising service for the professional mailroom. It offers high-tech capabilities, with an easy-to-use touchscreen and award-winning design. As one of the first USPS[®] IML-compliant meters in the market the PostBase[®] is one of the most secure mail machines available.
